

***UNMAPPING  
INFRASTRUCTURES***

***16.5.-19.5.2018***

FESTIVAL DEDICATED TO ART, HACKTIVISM AND OPEN CULTURE

ART  
MEETS  
RADICAL  
OPENNESS

“Art Meets Radical Openness” is a community festival, an open lab, and a meeting point for artists, developers, hactivists, and idealists involved with the culture of sharing and communal production. They are catalysts that spark new discourses and open up new directions of thinking. Free Open Source Software, open tools in general and the use of free licenses are the precondition and basis for the digital practice of a community like this, which impels social transformation.

The current issue “Unmapping Infrastructures” deals with the idea of “mapping” as a process of becoming aware and then acquiring a critical position about the current landscape of technological infrastructures.

This conglomerate of machines, human and non-human actors, nation-states and borderless companies is increasingly complex to observe and describe. Nevertheless, we believe that there is more to be seen than a hyper-commercialized structure of interlaced technological layers. How can art and activism appropriate the methods of cartographic mapping to produce new, critical and alternative views of the current landscape shaped by different players?

The event is in english language and free of charge.

Organized by servus.at in cooperation with

Department Time-based Media, Kunstuniversität Linz

Funders: BKA-Kunst & Kultur, Stadt Linz, Land OÖ

Partners: afo, Piet Zwart Institute, Stadtwerkstatt, Bildnerische Erziehung Kunstuniversität, qujOchÖ, Willy\*Fred
