Objectives

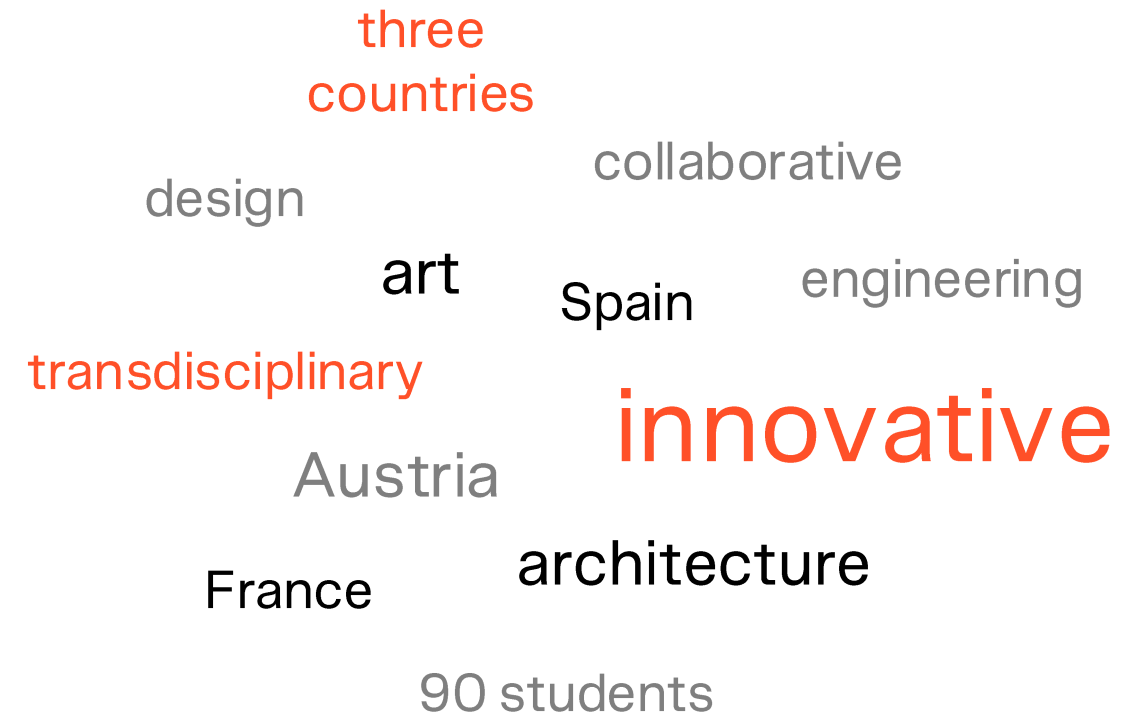

The SCALExD project aims to train a new generation of “**digital**” **craftsmen**, young designers, artists and architects. It focuses on establishing a new **interdisciplinary training programme** at the intersection between **art, design, engineering and architecture** that is capable of training HEI trainers and learners from **different backgrounds** to develop skills in the design and fabrication of large-scale artefacts using **new technologies and sustainable materials**.

Implementation

The SCALExD project will develop **transdisciplinary innovative contents** between design, engineering, art and architecture, through collaborative work.

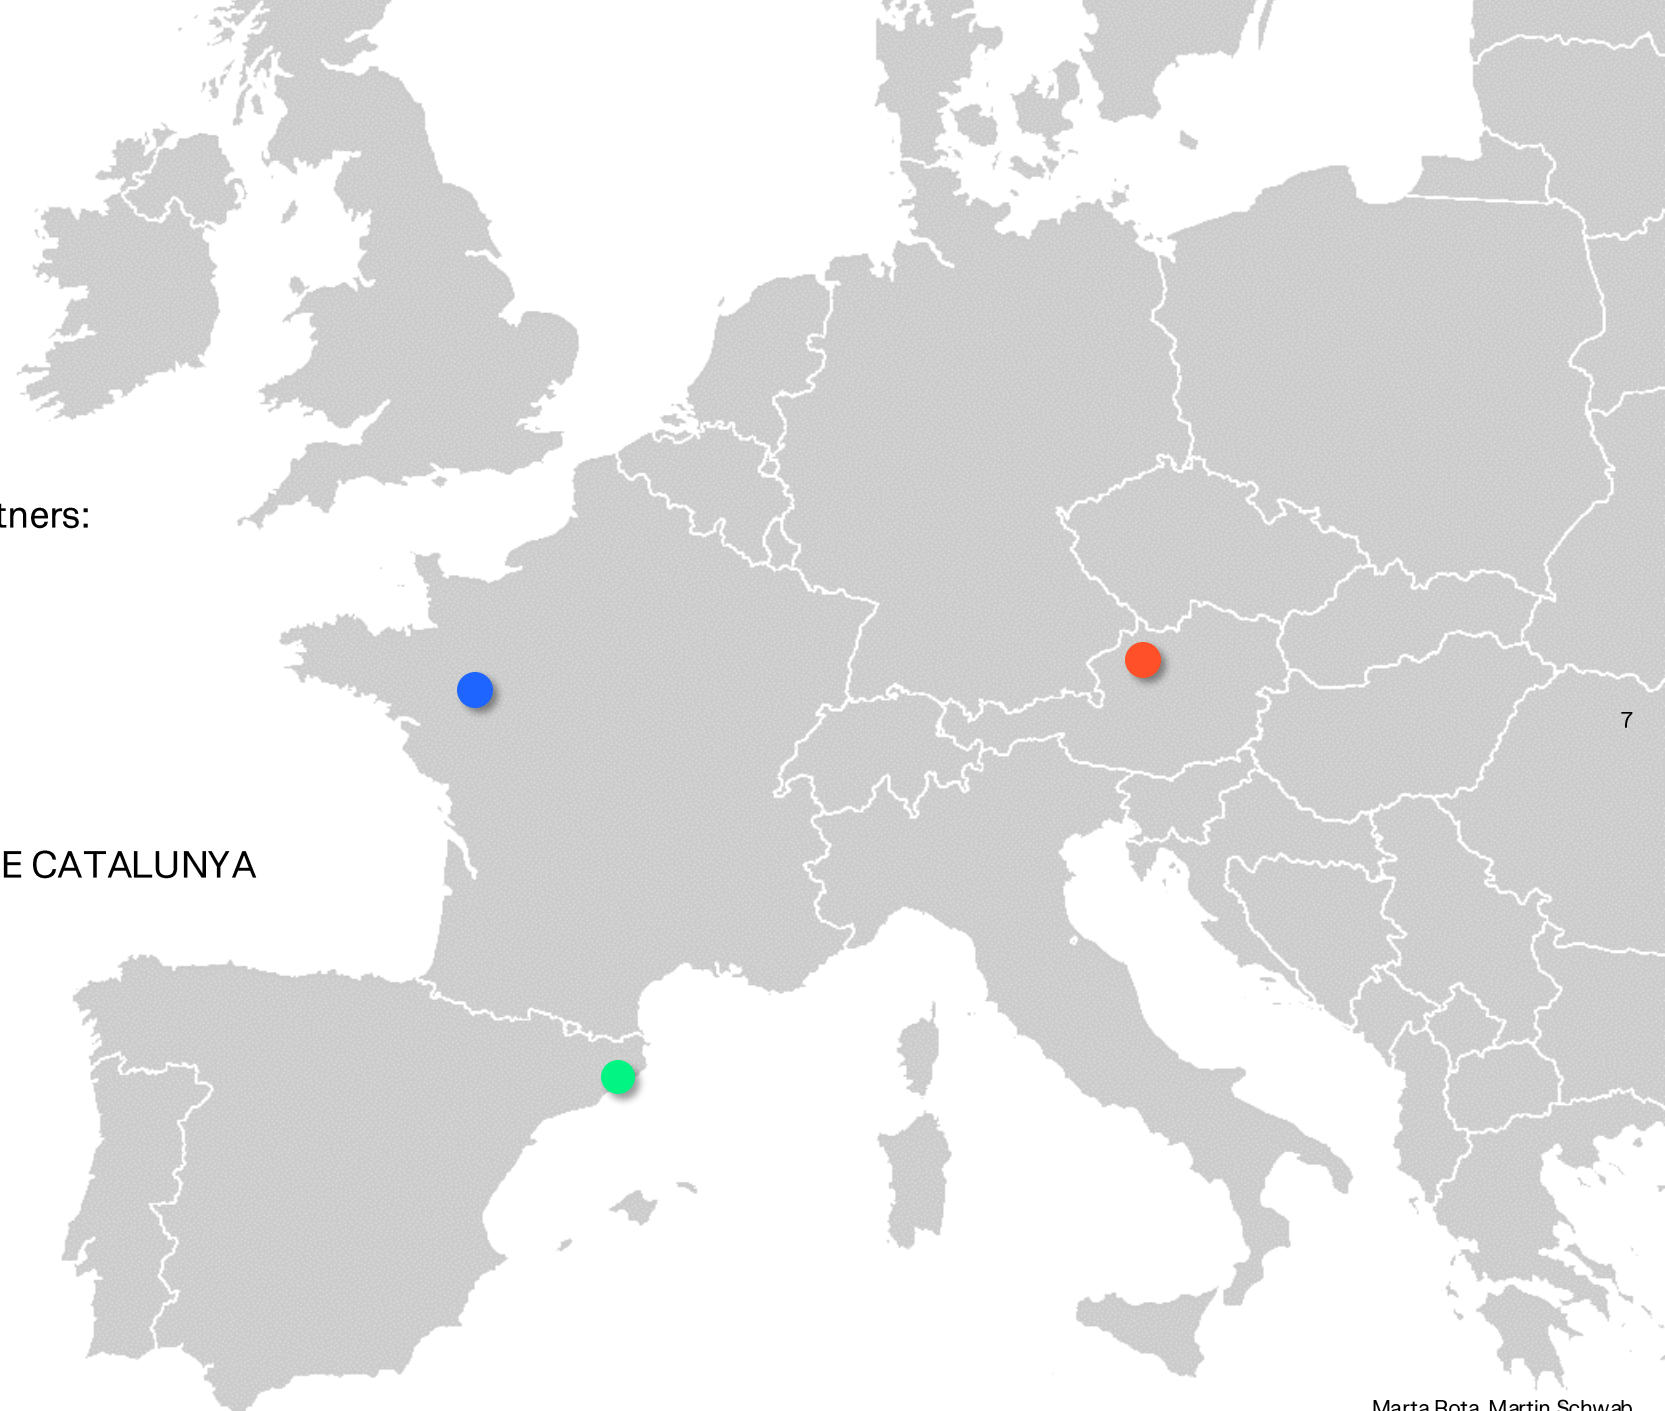

Three workshops with a total of **90 students** will be tested in **France, Spain and Austria**, in relation with different associated partners, as well as a short programme dedicated to professionals. A masterclass will be organized, combined with a dissemination event on the occasion of “Barcelona - 2026 UNESCO World Capital of Architecture”.
